

Industrial-Grade Cleaners, Lubricants, Tools & Gaskets

Curated supply solutions for the Oil & Gas sector

A curated selection of high-performance industrial solutions for the Oil & Gas sector

This catalog brings together a carefully selected range of specialized products designed to meet the demanding requirements of upstream, midstream, and downstream Oil & Gas operations. Every item featured in this catalog has been chosen with a clear focus: supporting safer, cleaner, and more efficient operations in environments where performance and compliance are critical. From biodegradable cleaners and environmentally responsible lubricants to high-performance maintenance chemicals and professional grade torque tools, this catalog offers solutions designed to reduce downtime, improve reliability, and ensure compliance with strict industry and environmental standards.

We understand that Oil & Gas operations require more than just products, they require dependable solutions that perform under pressure. This catalog reflects that commitment, bringing together the tools and materials your teams rely on to keep operations running safely, efficiently, and in full compliance.

Chapter Guide

Each chapter is assigned a unique color for quick identification and efficient navigation.

Cleaners

A comprehensive range of biodegradable, high-performance cleaning solutions designed for rig maintenance, surface cleaning, and heavy-duty degreasing. These products are formulated to be environmentally responsible while delivering powerful performance against tough industrial contaminants.

Lubricants

A selection of EPA-compliant hydraulic fluids, thread compounds, and specialty lubricants engineered for the most demanding offshore and high-temperature drilling environments. These solutions are designed to enhance equipment performance, reduce wear, and support operational reliability under extreme conditions.

Tools

Precision-engineered hydraulic and battery-powered torque systems from TorcUP, designed for critical bolting applications in both offshore and field operations. Built for accuracy, durability, and safety, these tools ensure dependable performance where it matters most.

Waste treatment

Precision-engineered hydraulic and battery-powered torque systems from TorcUP, designed for critical bolting applications in both offshore and field operations. Built for accuracy, durability, and safety, these tools ensure dependable performance where it matters most.

Gaskets

High-performance sealing solutions for industrial and offshore applications, providing reliable leak prevention in demanding operating conditions.

Cleaners

EnviroLogic CSR-2000 Cleaner

Industrial cleaner designed for large surface areas and heavy industrial use. RSC Bio manufactures readily biodegradable cleaners and functional fluids with minimal toxicity, as an alternative to petroleum-based products.

Hygea Universal Degreaser

Industrial cleaner designed for large surface areas and heavy industrial use. RSC Bio manufactures readily biodegradable cleaners and functional fluids with minimal toxicity, as an alternative to petroleum-based products.

Knockout HW

A concentrated formulation of the Knockout blend, using the same proprietary mixture of high-performance chemistries for heavy-weight applications — immediately dissolves and removes concrete, cement, or shotcrete buildup from any surface.

Cleaners

MegaSol

Significantly reduces cleaning time by aggressively penetrating and emulsifying bitumen deposits, even in the presence of other contaminants. Ideal for heavy oil sands and bitumen applications.

SurfiSol 315

Extremely versatile cleaning concentrate that uses powerful, natural surfactants to aggressively break the bonds of a wide range of contaminants. Can be diluted up to 30:1 depending on the application.

LevaSol 310

The longest-standing, most heavily proven product in the BioSol line — a true workhorse for a variety of industrial cleaning applications. Aggressively penetrates a wide range of deposits from light and medium oils to proteins and other organic matter, leaving no residue behind after rinsing.

Cleaners

MudWash 210

Designed to meet the demanding challenges of rig maintenance, targeting all types of invert mud, medium to light oils, greases, and other contaminants. Fully biodegradable, non-toxic, and non-regulated — with no noxious vapors, making closed-quarter cleaning straightforward.

BEFORE

AFTER

Lubricants

Oceanic HW443 – 275 gallon

A high-performance, high-temperature water-based hydraulic fluid, stable up to 145°C/293°F. Used in subsea production control systems and BOP control systems. Contains a fluorescent dye to aid in leak detection. Offers excellent corrosion protection and compatibility with materials used in subsea production control equipment.

EnviroLogic HF 68 HP – ELHP68005

Same formulation as the HF 46 but with ISO VG 68 viscosity grade, suited for applications requiring a heavier fluid. Both grades are natural esterbased and EPA VGP compliant for offshore use.

CSSB – BOL CSSB 45 (Copper Supreme Special Blend)

A non-lead, non-zinc compound that applies easily across a wide range of temperatures and conditions. Washout resistant and will not harden or bleed excessively in storage. Recommended for all drilling applications (rotary-shouldered connections), including high-temperature environments and open gear jackup legs.

Lubricants

Oceanic HW443 – 275 gallon

A high-performance, high-temperature water-based hydraulic fluid, stable up to 145°C/293°F. Used in subsea production control systems and BOP control systems. Contains a fluorescent dye to aid in leak detection. Offers excellent corrosion protection and compatibility with materials used in subsea production control equipment.

EnviroLogic HF 46 HP – ELHP46005

Industrial cleaner designed for large surface areas and heavy industrial use. RSC Bio manufactures readily biodegradable cleaners and functional fluids with minimal toxicity, as an alternative to petroleum-based products.

BESTOLIFE
PREMIUM COMPOUNDS

Tools

TORCUP

TU-3 Hydraulic Wrench

Housing machined from a single block of 7075 AQ aluminum to reduce torsion and flex. Features dual independent 360°×360° swivels and a pushthrough square drive for easy switching between tightening and loosening.

TORCUP

TX-4 Drive Cylinder

Drive cylinder compatible with the TX series for extended reach bolting applications.

TORCUP

EMAX-230V Torque Wrench Pump

230V electric hydraulic pump to power the hydraulic torque wrench system.

TORCUP

15' Hydraulic Hose w/Couplers

4.5-meter hydraulic hose with safety couplers connecting the pump to the wrench.

TORCUP

Portable Electric Unit – VTR-1000KIT

Battery-powered torque wrench with a 1" drive and a torque range of 240-1000 ft lbs (330-1350 Nm). Includes two 80Ah lithium-ion rechargeable batteries, a charger, and a storage case. Features a precision brushless motor for longer run time, cooler operation, a digital display, torque memory settings, and automatic reaction arm release.

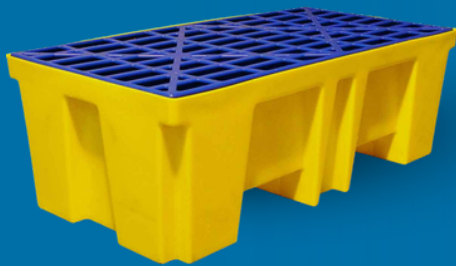

TORCUP

Waste treatment

ELASTEC SmartAsh Incinerator

The ELASTEC SmartAsh Incinerator is a compact waste disposal system for remote, offshore, and industrial sites. Using controlled-air combustion, it reduces waste volume efficiently while minimizing environmental impact. Its durable, low-maintenance design makes it ideal for platforms, camps, vessels, and industrial facilities.

SC-DP2

The Brady SC-DP2 2-drum spill pallet holds 68.7 gallons and features durable, chemical-resistant plastic construction. Its forklift-friendly, nestable design includes locking grate pins and a uniform height for easy alignment with SPC decks.

30% Recycled compactor bags

The Brady SC-DP2 2-drum spill pallet holds 68.7 gallons and features durable, chemical-resistant plastic construction. Its forklift-friendly, nestable design includes locking grate pins and a uniform height for easy alignment with SPC decks.

Gaskets

TEADIT is a global leader in the development and manufacture of advanced sealing solutions, trusted by industries worldwide for applications where reliability and safety are critical. Indutec Systems supplies a range of high-performance TEADIT gaskets designed to provide exceptional sealing performance in demanding offshore, oil and gas, marine, power generation, and industrial environments. Manufactured using premium materials and advanced engineering technologies, TEADIT gaskets are engineered to withstand extreme temperatures, high pressures, aggressive chemicals, and rigorous operating conditions while maintaining long-term sealing integrity. Their products help reduce fugitive emissions, prevent leaks, improve process safety, and enhance operational efficiency across critical systems such as pipelines, pressure vessels, heat exchangers, valves, pumps, and flange connections. With a strong commitment to innovation, quality, and environmental responsibility, TEADIT continues to set industry standards for sealing technology, delivering solutions that support safer, more reliable, and more sustainable operations.

INDUTEC SYSTEMS N.V.

Curated Industrial Supply for Oil & Gas Operations

Indutec Systems N.V. supplies specialized industrial products for Oil & Gas operations in Suriname, supporting offshore platforms, drilling contractors, pipeline operators, and industrial maintenance teams across the full operational value chain. Our portfolio is built around critical-use materials selected for consistent performance in harsh, high-risk environments where equipment reliability, safety, and operational continuity are essential. We focus on products that are proven in real field conditions, including offshore exposure, high-pressure systems, and contamination-heavy environments such as drilling mud, hydrocarbons, and industrial residues. By aligning our supply range with the practical demands of Oil & Gas operations, we help ensure that maintenance teams, engineers, and operators have access to solutions that support uptime, reduce equipment failure risk, and improve overall efficiency during both routine operations and shutdown activities.

Reliability, safety, innovation, and quality

Our Mission

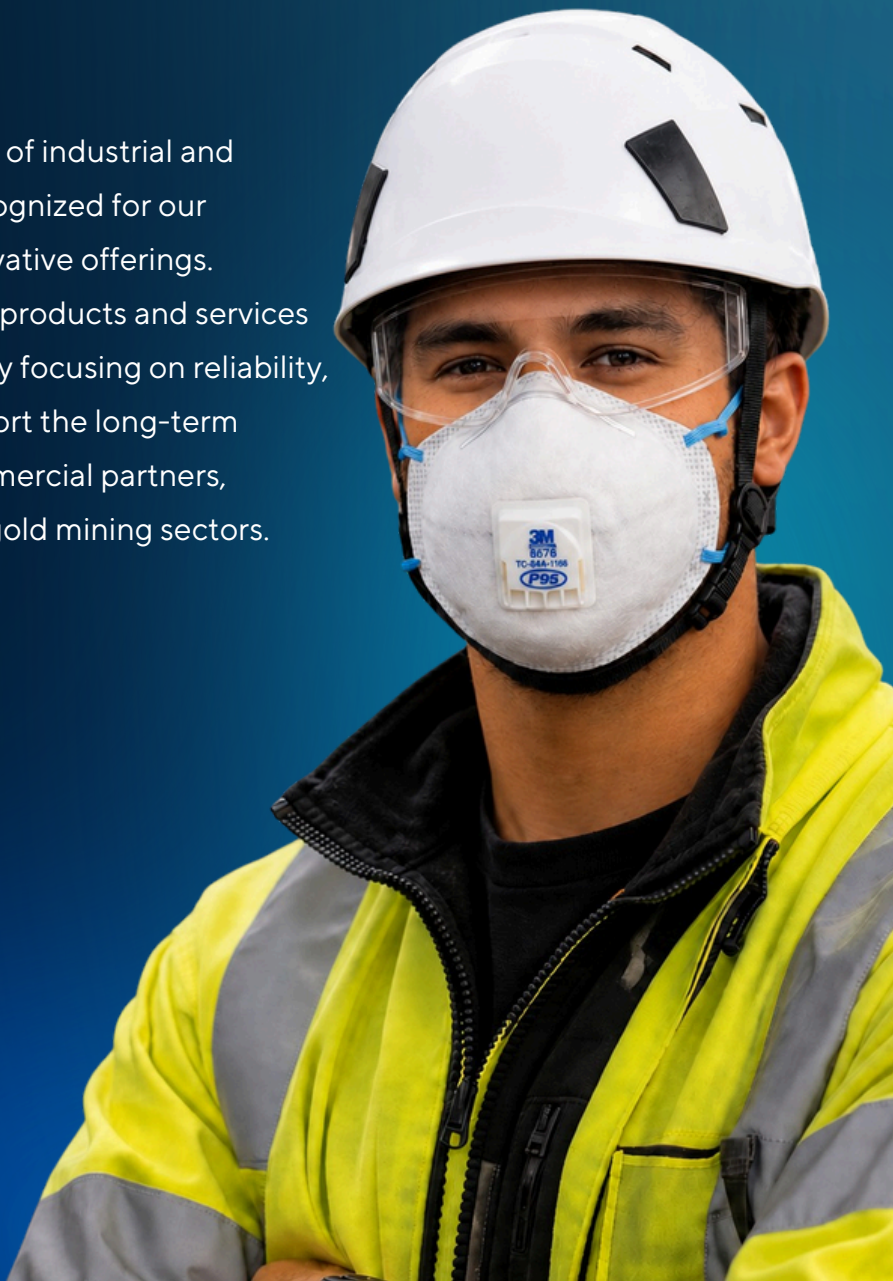

Our mission is to contribute to the growth of Suriname's industrial and commercial sectors by providing innovative, high-quality products that meet the needs of our clients. We aim to create a supportive working environment that empowers our employees to contribute effectively to the success of our customers.

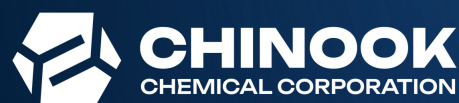

Our Vision

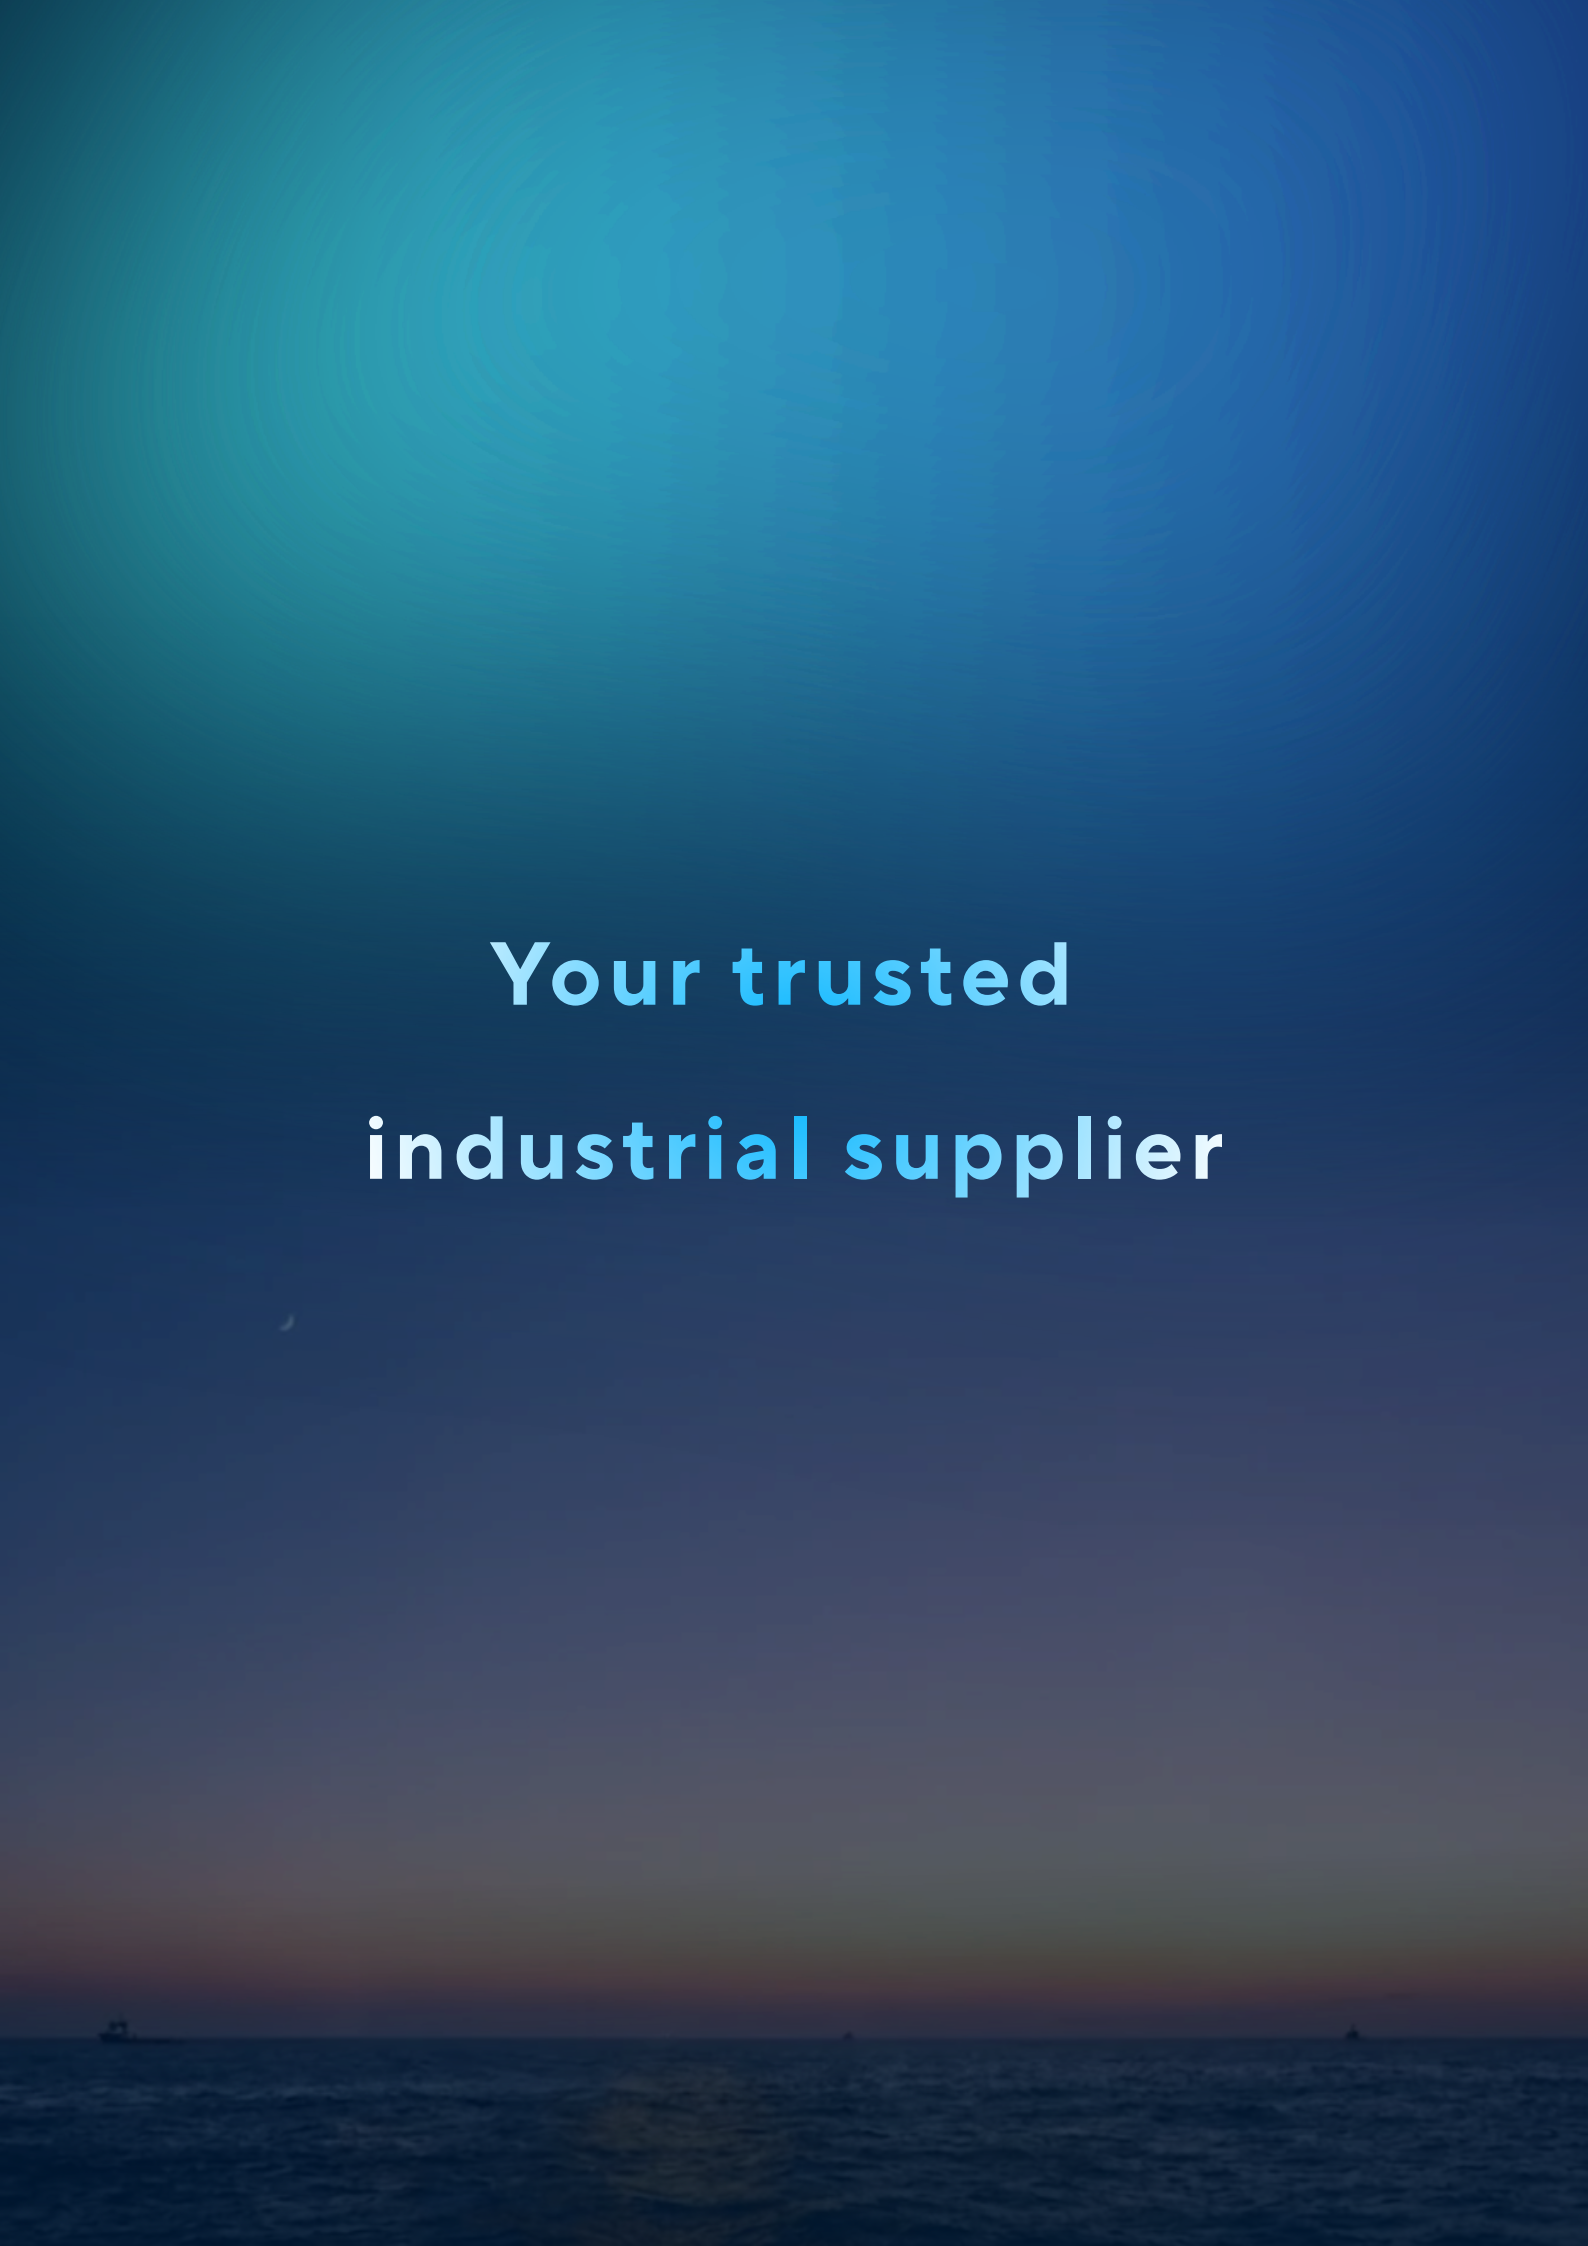

Our vision is to be the leading provider of industrial and commercial solutions in Suriname, recognized for our customer-focused approach and innovative offerings. We are committed to investing in new products and services that enhance our clients' operations. By focusing on reliability, safety, and innovation, we aim to support the long-term growth of both our industrial and commercial partners, including those in the oil and gas and gold mining sectors.

The background of the image is a serene sunset or sunrise over a calm body of water. The sky transitions from a deep blue at the top to a lighter, hazy blue near the horizon. A thin, white crescent moon is visible in the upper left portion of the sky. The horizon line is dark, with a few small, distant silhouettes of ships or structures visible on the water's surface.
